News of Mine, of Prospect, of Furnace and of Mill.

OLD MAMMOTH IN LINE AGAIN

Will Make a \$20,000 Distribution Among Its Shareholders on July 15.

S FORESHADOWED, the Mammoth of Tintic will make its reappearance in the dividend column on July 15, after an absence of three years, when a distribution of 5 cents a share, or \$20,000, will be made. With this in his "cachemeres," the shareholder who was present at the launching of the company will have participated in dividends aggregating \$1,860,000, and yet at a depth of 2000 feet in his company's estate its resources continue to respond. The last dividend passed around by the Mammoth was on July 12, 1901, and while it has been producing almost steadily since that date, its scrap with a neighbor, the exploration of new 'territory and its fight for a market better than was possible under contract with the smelter, has encroached upon its carnings to an extent that dividends for three years were impracticable. The last annual report of the management, indeed, disclosed an overdraft. Since that time, however, new ore bodies have been uncovered in new territory, wealth in stready volume has been poured upon the "open market," and the financial condition of the company today is a most gratifying one, with since that date, its scrap with a neighthe financial condition of the company today is a most gratifying one, with everything to indicate regular divicends in future. Upon the eplendid transformation Manager Samuel MeIntyre and his staff are to be congratulated, and this fact was recognized at yesterday's meeting of the board of directors. The transfer books on the dividend will close Saturday.

BLACK DIAMOND'S ANNUAL MEETING

The scharcholders of the Black Diamond of Stockton met in annual session yesterday, listened to the reading of statements on the financial condition of the company and the physical condition of its properties, and electing a board of directors, adjourned. The new board consists of Daniel Storms, Secretary of State of Indiana; William E. Beach, treasurer of Tippecanoe county, Indiana; W. C. Alexander, Joseph Dederichs and A. J. Bettles of this city. In the selection of officers Mr. Storms will no doubt be made president, Mr. Dederichs vice-president and ident, Mr. Dederichs vice-president and manager and Mr. Alexander secretary and treasurer.

The report on the mine indicates the ence of a large amount of milling with characteristic percentages of ore with characteristic percentages of first-class in the upper or original workings, and to determine this for economical extraction, a level will be extended from the 400-foot station on the incline to intercept three independent ore-bearing channels. This accompilished, active extraction will begin. Over results that have been achieved at the mine by David Lemmon, who has served the company as its super-intendent from the first, the officials who visited the mine on Monday were most enthusiastic, and congratulations were most freely bestowed on him.

HE SAW GOLDFIELD

IN ALL ITS GLORY

As enthusiastic as any mining man who has visited Goldfield, Nev., was John W. Langley, who returned from camp yesterday morning. He reports no fewer than seven mines now producing ore of excellent quality, the best evidence of the class of ore that at the January, which has now been productive of over \$20,000, all this since February 20 last. The management February 20 last. The management there is just now opening up the 200-foot level, and will begin raising the milling ore which must be at the surface before the expiration of the lease. At the Combination Mr. Langley reports the metallic contents of the sulphides better than the free milling rock than the free millin on the Jumbo, he says, twelves leases are now in operation, eight of which are in ore, some of which is of most sensational quality. He also reports important strikes at Diamondfield, conspicuous among them those in the Daisy and Vernal.

With the behavior

and Vernal.

With the behavior of the AnacondaTonopah, fifteen miles from Tonopah,
and which is being developed by him
and his associates. Mr. Langley is very
much pleased. While the main one
body has not been encountered, some running well up in silver and lead is being hoisted.

THE DALY-WEST'S REGULAR DIVIDEND

The Daly West of Park City will make its regular distribution of 40 cents a share, or \$72,000, on July 15, among those of record July 9. This was ordered at a meeting of the directore yesterday afternoon. It was rectors yesterday afternoon. It was also ordered at the same ression that the transfer books be kept open con-tinuously for the accommodation of those who desire to make prompt de-livery in the name of their clients. Under the former practice, these trans-fers were held up for five days, al-though Assistant Secretary Mountney has always been indulgent to the limit

HE SAW MINES IN INDIAN TERRITORY

Judge W. A. Sherman, who has been conducting an examination of mining properties in the Indian Territory, is back at home and in a few days will have decided the fate of the proposition. Concerning its whereabouts, or and particulars whatever relating to it.

The Judge pleaded yesterday that it is useful be imprudent to say anything at life time. He did see great stretches of corn in Kansas and fields of cotton in the Territory and the Territory, and a year of great bundance is promised each

SILVER MARKET AGAIN ADVANCES

Silver was manifestly strengthened by the long interval between quotations, and when the market reopened yesterday ruled at 58% cents an ounce, These figures are the highest at which the metal has ruled since February 12 last, since which date it has been down to 54% cents. Just what has stimulated it local authorities do not undertake to volunteer, more than that the consumers are restocking their warehouses and ers are restocking their warehouses and preparing for the active manufacture of autumn novelties. The more popular theory, however, is manipulation—the man who bought at 55 wants his scalp. Whatever the cause, the advance means more to Utah, now foremost among the producers of the white metal, than to any other State.

ALTA IS UNDER THE ELECTRIC LIGHTS

The inhabitants of Alta are reveling beneath the ray of the electric light the miner over the presence of electrical energy, privileges for which they are indebted to the Columbus Con. Mining company, although not a few will take off their hats to Tony Jacobson the founder and general manager of

that splendid undertaking.

It was on the night of the Fourth that the power began to gush from the electric motor, the lights to twinkle for the first time in a camp that is among the oldest and that has been among the most productive in the State. The achievement is perhaps the most important in the chronology of Alta, for with electrical energy its equipment compares favorably with any in the West. The big compressor from which the power drills will derive their energy with any properties of the compared with a superstance of the compared with the power drills will derive their energy with the compared win the compared with the compared with the compared with the compa ergy went into operation yesterday, and the drills will begin to gnaw their way

into the rocks today.

To accept the plant were President Tony Jacobson and Arthur E. Snow Secretary of the Columbus Con., while accompanying them was Manager Cargo of the Westinghouse company and James J. Eurke, the contractor.

RECEIVER'S CLAIMS STAGGERED THEM

That receivers "come high" to whatever responsibility they may be asassigned, is known, perhaps, to every person who ever had occasion to call in one, but that Receiver Tanner, who was made custodian of the Majestic company's mines and smelters down at Milford some time ago should exact \$1000 a month for his services has fallen among those now seeking to adjust the among those now seeking to adjust the company's affairs and to extricate it from the courts, with the violence of a thunderbolt. It is said to have convulsed W. B. Mucklow, who came West as the special emissary of the minority in the Majentic by which \$109,090 was subscribed, while Frank Knox, who has been designated as the trustee or disbursing agent, confessed that he had been staggered and he has, as a banker, had some experience with receivers, too. As trustee, saly Mr. Knox, yesterday, he will recommend that receiver's claim he resisted. In his opinion it is ridiculously exorbitant. ously exorbitant.

Senator Tanner, who is in the south, feels no doubt that a receiver's com-pensation should be determined largely by the value of assets over which he has been exercising a stewardship and

has rendered his bill accordingly.

The arrival of claims against the company held about Milford is expected today, when the active disbursement of the fund now in the hands of Trus-tee Knox will follow.

GEORGE GUNN ON CAMP GOLDFIELD

Not only is Goldfield out of Tonopah a most phenomenal camp, said George Gunn, field representative of the American Smelting & Refining company, on his return from there yesterday, but it presents many of the possibilities of a Cripple Creek, and in another year should become one of the greatest sources of gold the country has ever known. It is already demonstrated to his satisfaction that the January and Combination are mines, making money for their owners as well as the lessees, while values in the Jumbo are nothing less than astounding—some of the ore worth over \$1000 per sack. Mr. Gunn, who rarely enthuses, confessed that on his visit to Goldfield, sentiment had been forced to relax.

Mining Locations Filed.

Special to The Tribune. PROVO, July 5.—The following mining locations were filed for record this morning: The May Day Nos 1 and 2. The properties are in the Silver Lake mining district and join the Silver King mining group in American Fork canyon. The locator is John Armstrong.

A DAY'S SETTLEMENTS IN ORE AND BULLION

In the ore and bullion market the day's settlements amounted to \$76,700, McCornick & Co. reporting them as they follow: American bullion, \$34,700; gold bullion, \$5500; gold, silver, lead and copper ores, \$36,500.

In the metal market silver ruled 58% cents an ounce, lead at \$3,50@4.20 per 100 pounds, and casting copper at per 100 pounds, and 11% cents a pound.

If for any cause THE TRIBUNE is not delivered regularly to subscribers please call up Telephone 350 and notify the City Circulator. Your complaint will receive prompt attention.

A standing reward of Ten Dollars (\$10.00) is offered for the arrest and conviction of anyone caught stealing THE TRIBUNE.

DAY ON 'CHANGE

A LIFELESS ONE

The mining exchange reopened to cusiness yesterday morning, after an interval of three days, and closed its essions on the transfer of 10,700 shares, for which \$1216.13 was paid. 'The day's trading was provokingly featureless, unless that quality was to be derived from Mammoth, which sold up to \$1.21, while for a lot of 500 Con. Mercur the buyer was required to shell out 26 cents. Lower Mammoth showed some activity under comparison, as did Star Con., which brought 12 cents on a report that the new board of directors proposed to devise means by which its port that the new board of directors proposed to devise means by which its Tintic properties shall be systematically developed. Nalidriver, in which some ore of fine commercial quality is occurring at intervals, released a small lot to a bid of 25 cents, while Silver Shield sold at 5 cents. The heavy-weights were lifeless, the day closing on the following market: on the following market:

Boston Coppers Hold Their Own.

special to The Tribune. Special to The Tribune

BOSTON, July 5.—The copper share
market is holding its own as far as
strength is concerned; trading today was
confined to a few stocks, but these showed
decided strength. Utah is the feature,
being in good demand almost from the
start, with little stock offering for sale.
Other shares, while inactive, displayed a
fair demand, although few sales were
made. Commission houses are accumulisting buying orders, which gives the
market a good undertone. The closing
was strong. Hornblower & Weeks, brokers, 53 State street, Boston, and 10 Wall
street. New York, furnish the following

THE TRIBUNE NEWS STANDS | CAPT. DE LA MAR IN NEW CAMP

His Expert Representative Makes a Thorough Examination at Mountain City.

HAT the field representative of

Capt. De La Mar has invaded Mountain City, Nev., and that a deal is being made in his interest for the Nelson mines and mill, was for the Neison mines and mill, was verified yesterday on the arrival of S. G. Watson, a prominent Nevada mining engineer from the new camp. Indeed, the visitor participated with M. J. Heller, the Captain's field man, in the examination of the group on which an option has been running for some time in favor of Russell, Pedder & Co. of Pittsburg. The result of the examina-tion, said Mr. Weston yesterday, was a most favorable one, the average de-rived from samples taken from a stretch of 120 feet along the strike of the ledge approximating \$200 per ton in gold and silver. This was along the tunnel level and at a vertical depth of 400 feet beneath the surface. Mr. Russell, representing the option, has gone East to negotiate with Capt. De La Mar, the amount on which the deal has thus far progressed is a considerable

one.

Coming out from camp Mr. Weston was passed by Morris M. Johnson, the representative of Samuel Newhouse, and E. H. Mead, the latter the first of the Salt Lake contingent to embrace the offerings held out by the new camp. Meanwhile John Poole, representing David Moffat of Colorado, has taken hold of the Kunz group in the same locallty and promises vigorous work while others are on the ground and sparring for a foothold. For a youngter, the camp has not a few celebrities dancing attendance upon it.

THE BINGHAM CON.'S INITIAL DIVIDEND

A special dispatch to the News Bureau of New York says:
"Bingham Con. stock has recently "Elingham Con. stock has recently been a strong feature of the local market, although its price is still considerably lower than the high mark for the last two years. The present strength of the stock is ascribed to the favorable reports which the home office has been receiving from the mines. The company has floated an issue of \$1,000,000 bonds, and has paid off its floating debt, created in buying certain \$1,000,000 bonds, and has paid off its floating debt, created in buying certain new properties. The net earnings are understood to be large, and the company is now in a position to apply them, with the exception of the annual interest charge on these bonds, to dividends on the stock. It is said in well, informed circles here that Bingham stockholders are likely to receive their first dividend early in 1905. At its present rate of earnings the company is said to be showing \$2 a share for its stock, and the showing is being bettered right along."

THE LINCOLN MINES IN PEARL DISTRICT

In a lengthy review of Pearl district, Idaho, the Engineering and Mining Jour-

Idaho, the Engineering and Mining Journal says:

The Lincoln mine is the farthest west of any in the district. It is controlled by David Kennedy of Kingston, N. Y.; J. T. Hodson and J. H. Stallings of Salt Lake City. Utah, the last named being superintendent. An incline shaft is down 250 feet on the vein. From the 100-foot stallion a 300-foot drift runs east; and from the 200-foot a drift is driven east over 1000 feet in ore without reaching the eastern limit of the ore shoot. Drifting from the 250-foot station has begun. A steam hoist is used, but the mill is operated by electric power, transmitted from the Payette river. The mill has a crusher, rolls and a Chilean mill, with amalgamating plates following it. The material passing over the plates is concentrated. The capacity is about 150 tons per twenty-four hours. Experiments with cyanide are being made, the idea being to cyanide the concentrates.

Mining Notes.

Ed Hoffman, the experienced superintendent of the Silver Shield of Bingham, was in from camp during the day.

George B. Norman, superintendent of the Carisa of Tintle, is in town conferring with the management.

Two lots of lease ore from Tintic's Carisa were sold on yesterday's market, with another consignment in transit.

Louis E. Stoddard, president of the Bingham and New Haven Mining company, arrived from New Haven yesterday to inquire into conditions at the mines and also to look into the Dixie mines and smelter out of St. George that are controlled by his syndloate.

S. G. Weston, who is in the city from Elko, Nev. says that active development on the Bail more group out of that camp will be resumed the present month. will be resumed the present month.

Tonopah Bonanza: A. C. Ellis, Jr., vicepresident of the Montana-Tonopah and
late secretary of the Tonopah-Sait Lake,
arrived yesterday morning. Mr. Ellis,
visit is mainly to adjust matters of detail
as to ore, etc., in connection with the
transfer of the Salt Lake property to the
Jim Butler Mining company. He will, of
course, thoroughly inspect the famous
Montana mine.

While the new \$3,000,000 company organized under the laws of Maine and of which a Tribune dispatch told yesterday morning is to take in, no doubt, the holdings of the Utah-Apex group at Bingham, the local management would not discuss it during the day.

Superintendent C. E. Allen of the United States company has gone into the dig-gings again. The Star Con's directors who met dur-

ng the afternoon to consider the report of the auditing committee pleaded an ad-ournment that there was nothing what-ever to be released at this time. Henry Irwin, representing the Boston on interests down at the valley for-aces, came up from Bingham Junction esterday morning to confer with Presi-The Salvator of Tintle has posted a \$2000 dividend, to be paid July 11.

ASSESSMENT NO. C.

Old Evergreen Mining and Tunnel com-pany, Big Cottonwood mining district, Sait Lake county, Utah. Principal place of business, Sait Luke City, Utah. Sait Lake county, Uthn. Frincipal place of business, Sait Lake City, Utah. Notice is hereby given that at a mesting of the board of directors of the Old Evergreen Mining and Tunnel company, a corporation, held at the office of the company, at Sait Lake City, Utah, Tuesday, the 2sth day of June, 1804, an assessment of 3 cents per share was levied upon the capital stock of the corporation, payable immediately to H. G. McMillan, secretary and tressurer of the company, at his office, No. 181 South Main street. Sait Lake City, Utah. Any stock upon which said assessment may be unpaid on the 20th day of July, 1934, will be delinquent and unless payment is made before, will be sold at my office on the 22nd day of August 1934, at 12 o'clock nean, to pay delinquent assessment, together with the cost of advertising and expense of saic. (Seal.) HENRY G. McMillan, Secretary, No. 181 South Main Street, Sait Lake. No. 161 South Main Street, Salt Lake City, Utah, June 28, 1904.

Cool Cooking

Is easily accomplished on our "Insurance" gasoline stoves. The heat is closely confined and not disseminated beyond the stove itself, giving heat where heat is required. They are cleaner, less expensive to opperate and in every way more satisfactory than coal stoves for summer cooking. See the display of new models in our window.

VERYTHING IN HARDWARE + 42 44 46 W. 24 50.

C. W. HIGGINS, M. D.,

SPECIALIST.

Microscopic and Analytic Physician.

CURES Fits, Nervous Weakness, Neuralgia, Varicoccie, Weak Spine, Biliousness, Gravel, Sore Eyes, Ling Discases, Tape Worm, Dyspepsia, Liver and Kidney Complaint, Deafness, Catarrh, Erysipelas, Old Sores, Scrotula, Rheumatism, Stiff Joints, Piles in their worst form. Those afflicted with Epilepsy or Fits can be permanently cured.

By the aid of the Microscope we can detect Calcut, Cancerous Matter, Carbonate of Lime, Albumen, and all extraneous substances mixed with the Urine or Blood. This is the scientific principle of treating Chronic Diseases.

Can be found at his office, St. Elme Hotel, from 10 a. m. to 4 p. m. Rooms 17, 18 and 19, 7 to 9 p. m.

THE KNOWLEDGE OF DISEASE IS HALF ITS CURE. MAN, KNOW THYSELF.

IF YOU WANT CASH FOR YOUR BAD DEBTS

No matter how large they are or in what town, city. State, or Territory.

If we did not know we could collect your bills, we certainly would not be paying out money to advertise.

We advertise because we want your claims for collection. Our ability to make collections where all others have falled, has enabled us to build up the largest collection business in the world.

This ad, is sure to bring many claims to our offices for collection, and we are just as sure to collect these claims and make money in commissions thereon.

CURES DISEASES

Nervous Debility

Varicocele

Cures quick and radical in 20 to 60 days, by my own fa-mous method.

Completely and permanently cured by my new pro-cess; all disagreeable symp-

toms foon disappear com-pletely and forever; it is sufe, painless and bloodless. An absolute cure guaran-teed.

Scientific Collectors of Debts, Publishers of Credit-Records of Delinquent Debtors, who can but refuse to pay their just debts, and consequently unworthy of trust and confidence. REPORTERS of How People pay their bills.
